Subject: Fw: Freshwater Standards- need your help!
Date: Monday, December 05, 2011 11:00:03 AM

Hi Cheryl,

I'm meeting with Chance and Martha this Thursday to talk about the SMS from 11:30-12:30 since they will be up in Seattle for another meeting that afternoon. Are you interested in calling in? If so, I can arrange to have a phone available in the room. If you'd prefer not to, I understand as well.

Thanks,

Matthew Szelag

I think an hour would suffice. See you Thursday.

Yes, 11:30am will work. I will reserve a conference room. How long do you expect the meeting to last?

Give me a call when you arrive and I will meet you at the visitor check-in on the 12th floor. Thanks,

Matthew Szelag

How about we meet on Dec 8 at 11:30?

Hi Chance,
Thanks for the clarification. I am available until 4pm on December 8 to talk to you and Martha, if that works for you.

Regarding the question on ESA consultation, Jeff Lockwood's description is accurate. Any provisions that will come to EPA for action as water quality standards that have an potential to affect listed or endangered species will need to go through ESA consultation. Recall the 1999 letter that you, I and Dave Bradley have discussed which contains EPA's view on what is/isn't a water quality standard in the SMS. This is

probably a good guide for anything that will need EPA action and therefore ESA consultation (if it involves aquatic life).

Please let me know what time on the 8th will work for you. Thanks,

Matthew Szelag

Matt,

I'll be your contact for the SMS rule and any EPA approval/ESA consultation needs. At some point in the near future, I'd like to have a touch bases meeting with you (over the phone is fine) to get us both oriented about what our needs are and next steps. It happens that Martha and I will be in Seattle on Dec 8. Would you have any time in the afternoon to have a quick discussion?

Subject: RE: Freshwater Standards- need your help!

I sent out the original inquiry based on a request from Chance Asher, for support of the Freshwater Sediment Standards that are being promulgated.

Laura

Hi Matt,

I believe this is about the sediment standards rule-making (including the FCR project), which we have talked about before. Laura may be referring to areas of focus in that rule-making that address bioaccumulation that could affect organisms, as well as sediment standards to protect aquatic life.

You should talk with Martha Hankins, who is leading the rule-making effort on this issue. Martha and I recently talked about this topic, and about her contacting you, and I am sure she would like to touch base. Here is Martha's contact information:

Martha Hankins
360-407-6864
Martha.hankins@ecy.wa.gov

Hope this helps.

Cheryl

Hi Cheryl,
Do you know if this email is referring to the ongoing contaminated sediment work/FCR project or is this something separate?

Everyone: Matt Szelag is the Washington state WQ standards coordinator.
He may consult with John Palmer on ESA related questions. I've copied
him. His number is (206) 553-5171.

Laura,

If Ecology needs approval from USEPA for promulgating the state
standard, then USEPA will need to decide whether they need to consult
with NMFS and USFWS. Ecology doesn't need to approach us directly. If
there is no EPA approval required, then we would be headed more toward
an optional habitat conservation plan or other non-federal mechanism for
ESA coverage for Ecology. I'm copying John Palmer who can help answer
your question or get you to the right person at EPA.

Jeff

Hi guys-

Ecology is getting to the point where we would like to start
coordinating with the appropriate agency people regarding ESA
consult/review for the freshwater sediment standards we are trying
to promulgate. I know you are not the people who would be doing
this, but Ecology needs to know if a formal consult will be
required, or a review is sufficient, and who the appropriate
people for actually coordinating with would be. I'm hoping you
can assist me in getting in touch with the correct people. Can
you please point me in the correct direction?

THANKS!!
